After talking to Mr. Wayne McCoy of Pfizer, it was decided that a process description* would be sent to the FIT office and an on-site inspection be omitted unless a potential for pollution was seen. Mr. McCoy reported that pickle liquor is recycled at this plant and no hazardous wastes are produced. Any leftover liquor is neutralized so as to make it nonhazardous. This and a sludge, rich in iron oxide, are disposed of at a permitted landfill.

An on-site inspection was determined to be unnecessary and no further action is recommended.
